

Serial No.: 10/828,714

**IN THE CLAIMS:**

Please amend the claims as follows:

1. (Currently Amended) A refrigerator comprising:
  - (a) a cabinet including at least one wall and a door pivotally mounted to the at least one wall to define a refrigeration compartment;
  - (b) a first water supply line extending into the cabinet and adapted to interface with a removable water supply, wherein the first water supply line is connected to a water dispenser and an ice maker for supplying water contained in the removable water supply to the water dispenser and the ice maker; [[and]]
  - (c) a mount attached to the cabinet and positioned to hold the removable water supply in the refrigeration compartment for interfacing the first water supply line;
  - (d) a second water supply line adapted to interface a water tap and having connection to water dispenser and ice maker for supplying water from the water tap to the water dispenser and ice maker; and
  - (e) at least one control valve having inputs connected to the first and second water supply lines and at least one output connected to the water dispenser and ice maker for controlling the output of water from the water tap and removable water supply to the water dispenser and ice maker.
2. (Original) The refrigerator of claim 1, wherein the first water supply line extends through a rear wall of the cabinet positioned across the refrigeration compartment from the door.
3. (Canceled)
4. (Canceled)
5. (Canceled)
6. (Currently Amended) The refrigerator of claim [[5]] 1, further including a water supply switch connected to the first control valve for selecting one of the water tap and removable water supply for output to the water dispenser and ice maker.

Serial No.: 10/828,714

7. (Original) The refrigerator of claim 1, further including a water storage tank connected to the removable water supply and the first water supply for storing water from the removable water supply.
8. (Original) The refrigerator of claim 7, wherein the water storage tank is positioned in the refrigeration compartment.
9. (Original) The refrigerator of claim 1, wherein the cabinet includes at least one guide to position the removable water supply in the cabinet when the removable water supply is inserted into the cabinet.
10. (Original) The refrigerator of claim 9, further including a probe adapted to interface a cap of the removable water supply.
11. (Currently Amended) A refrigerator comprising:
  - (a) a cabinet including at least one wall and a door pivotally mounted to the at least one wall to define a refrigeration compartment;
  - (b) a first water supply line extending into the cabinet and adapted to interface with a removable water supply;
  - (c) a water dispenser and ice maker connected to the first water supply line for receiving water from the removable water supply; [[and]]
  - (d) a mount attached to the cabinet and positioned to hold the removable water supply in the refrigeration compartment for interfacing the first water supply line;
  - (e) a second water supply line adapted to interface a water tap and having connection to the water dispenser and the ice maker for supplying water from the water tap to the water dispenser and the ice maker; and
  - (f) at least one control valve having inputs connected to the first and second water supply lines and at least one output connected to the water dispenser and the ice maker for controlling the output of water from the water tap and removable water supply to the water dispenser and the ice maker.
12. (Canceled)
13. (Canceled)

Serial No.: 10/828,714

14. (Currently Amended) The refrigerator of claim ~~[[13]]~~ 11, further including a water supply switch connected to the first control valve for selecting one of the water tap and removable water supply for output to the water dispenser and ice maker.
15. (Canceled)
16. (Canceled)
17. (Canceled)
18. (Canceled)
19. (Canceled)
